## (54) CLEANING METHOD OF ENDOSCOPE AND DEVICE THEREFOR

### (57)Abstract:

PURPOSE: To surely sterilize and clean the surface of an endoscope in a short time without residual property, and also temporarily store the alkaline water and acidic water used for the cleaning to discharge them after neutralization, thereby eliminating a problem of secondary pollution.

CONSTITUTION: A device 1 for forming alkaline water and acidic water by electrolysis of brine, a storing tank 3 for the formed alkaline water and acidic water, a cleaning device 4 for successively supplying the alkaline water and acidic water to clean the surface of an endoscope, an air supplying device 5, and a neutralizing tank 6 for storing the alkaline water and acidic water after the cleaning to neutralize them are used.

## LEGAL STATUS

[Date of request for examination] 17.12.1993

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or

application converted registration]

[Date of final disposal for application]

[Patent number] 2576033

[Date of registration] 07.11.1996

[Number of appeal against examiner's  
decision of rejection]

[Date of requesting appeal against examiner's  
decision of rejection]
